

Coes of Derby are an efficient and proactive supplier for AMK (Aecom/Murphy/Keir JV) particularly in meeting tight deadlines. Coes strike just the right balance between being a flexible, easy to deal with local firm yet having all the key strengths, attributes and experience necessary to support AMK . I am particularly indebted to Wendy Dent and her production team who last year committed to and successfully executed the challenge of delivering all GRP requirements for Stream B Deephams STW Final Settlement Tanks for our client Thames Water. A tremendous achievement thank you Craig Thomson Aecom Supply Chain.
